PROFILE

I am a passionate person. I see problems as a possibility to improve ourselves or as an opportunity to create something better.

I love teamwork because you can always go the extra mile in any aspect.

I am a persevering and focused person and I am aware that not all things are going to be fine and that 90% of the things that happen to us we do not control, however, our attitude does, and it will depend on whether the things we do are perfect.

EDUCATION

Computer Systems engineering, Tecnologico de Monterrey, Toluca de Lerdo, Mexico

August, 2018
